To determine Sq. Feet: Multiply the width (in.) by the height (in.), then divide by 144.

How to price 6 Custom Banners, size 60 in. x 42 in.

$$\frac{60 \text{ (in.)} \times 42 \text{ (in.)}}{144 \text{ in.}^2} = 17.5 \text{ ft.}^2$$

$$17.5 \text{ ft.}^2 \times \$4.35 \text{ per Sq. Ft.} = \$76.13 \text{ (C) per banner}$$

**Partial Overlap Seal End (POSE)** boxes are the most economical option for larger breweries with canning lines and gluing machines.

### Partial Overlap Seal End (POSE)

Has openings on both sides so that cans can be filled from either side.

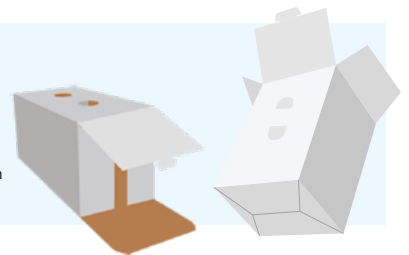

Must be glued after loading the product.

### Auto-Bottom (AB)

Opens from one side that has a locking tab for easy filling.

Comes pre-glued, snaps in to place when unfolded.

## Quick and easy to apply!

1. Lay decal **face up** on a smooth hard surface. Squeegee the surface to ensure good contact between the pre-mask and the vinyl beneath it.

2. Lay decal flat **face down**. Slowly remove backing paper from the pre-mask, pulling straight back and flat as shown (not at an angle).

3. Apply pressure-sensitive vinyl to prepared surface, then squeegee pre-mask surface using overlapping strokes.

4. To expose product, pull pre-masking straight back as shown above, using a continuous motion. If bubbles occur in the letters, simply prick with a needle and smooth. Do not use a knife or razor.

**Note:** White Pro-Cuts may be supplied on a colored liner for improved visibility. Clear pre-mask is also available on some items. While different liners and pre-masks may have different release properties, all material types will release successfully following the steps specified above.

# Artwork Guidelines

## Requirements by Print Method

### Spot Color Printing

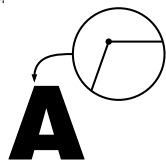

All jobs require vector artwork. If raster artwork is the only art available, contact customer service.

### 4-Color Process Printing

Vector artwork is preferred. If raster artwork is submitted, a minimum of 600 dpi is recommended for best results.

### Vector Artwork

Vector artwork is an image created of points and paths. This artwork is editable, scalable, and able to be separated for spot color reproduction.

### Raster Artwork

Raster artwork is an image created of many pixels. This artwork is not editable, scalable, or able to be separated for spot color reproduction.

## Software and/or File Format

### Preferred

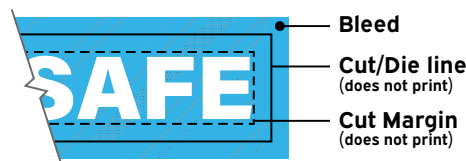

PDF (Fonts converted)  
Creative Cloud  
Illustrator .ai .eps  
InDesign (Include fonts and links)  
Photoshop (Layered)

## Guide to Submitting Artwork

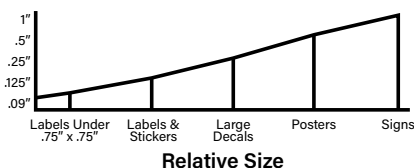

1. Include a .jpg, .png, or .pdf for reference.
2. Convert all fonts to paths/outlines.
3. Include or embed all placed images.
4. Submit artwork at actual size.
5. Identify all spot colors.
6. Allow for bleed if necessary.
7. Submit the original file if possible.
8. Never flatten/merge the layers of a .psd.
9. Indicate the cut/die line clearly.
10. Verify art meets all Artwork Guidelines.

## Cut Margins, Bleeds, Fonts

**Cut Margin** is the minimum space required between elements of art and the finished edge of the product. Size and type of product are the two main factors that determine cut margin. Note that bleed borders must meet or exceed our minimum cut margin.

### CUT MARGIN GUIDE

**Bleed** is the distance the ink extends past the finished edge of the product before final cutting. Standard minimum bleed is 1/8" (.125"). Raster files must allow for the required bleed when submitted because they are not editable like vector files.

**Converted text** is vector artwork and as such can no longer be spell-checked. However, it does not require fonts in order to be displayed or printed correctly.

**Live text** is still in a text format in the artwork's original program and can still be spell-checked and corrected. Live text requires the fonts used in order to be displayed and printed correctly.

### Minimum Font Sizes

Sans Serif in All Caps	Positive: 4 pt. bold	Reverse: 6 pt. bold
Serif in All Caps	Positive: 6-8 pt. bold	Reverse: 10-12 pt. bold

## Alphanumeric Numbering, Variable Data, Barcodes

**Alphanumeric Numbering** is available with letters for use as prefixes and suffixes. Example: "A123", "123 RED LOT"

**Variable Data** is available for copy such as phone numbers and locations. Submit a spreadsheet containing the data.

**Barcodes** are available as constant, variable, or consecutive, in Code 39. Barcodes with variable numbers will require a spreadsheet. Chrome and reflective materials will interfere with code readers. White is required behind barcodes and QR codes.

### Opacity and Contrast when using White Ink on Clear Materials

Clear materials often require white to maintain color integrity. Three options are typically used depending on the art and text elements.

#### Flooding the background white

Flooding coats the entire decal with white and, except on rare occasions, it should be done with face application clear decals only.

#### Applying a white halo to elements

Elements with a halo are backed for opacity and have white extending slightly beyond the art creating a "halo" effect. It is best used to increase contrast against dark backgrounds.

White viewed from front

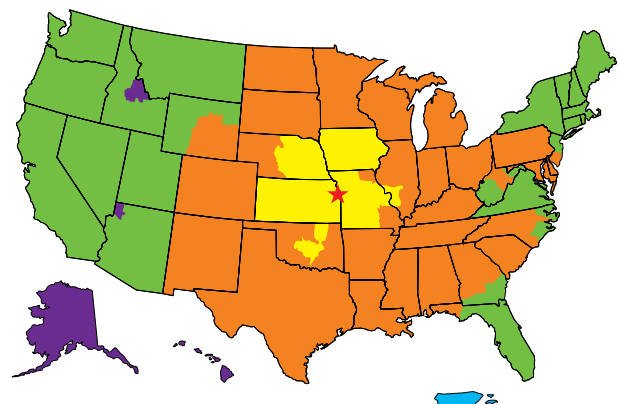

White viewed from back

#### Backing up elements or text

If the text or elements are thick enough, the white can be printed behind the text or elements only. While adding opacity, white would be unseen from the front of the decal.

# Services, Ink Colors, and More

## More Than Printing

### Custom Products

Custom Products are part of our DNA. Everything found in our catalog is made-to-order. This makes everything we do "custom." Contact us with your application details if you need an item not found in the catalog. We are glad to review projects with specialty materials, complex die-cutting, extended quantities, and more. Making custom products to solve unique applications is what we do every day.

### Foil Stamping

Foil Stamping is available for many products in our catalog in addition to those items that list it as an optional service. Adding foil enhances appearance and provides security features.

### Numbering/Barcoding/Variable Data

We are glad to help with applications that require numbering/barcoding and other variable data elements on a variety of our products.

### Shrink Wrapping

Do you need items packaged in sets of 25, 50, 100, or 250? Standardized packs help with the presentation of product, distribution, and inventory.

### Kitting/Boxing

We frequently assemble groups of our products into kits to assist with distribution, fulfillment, and inventory. These can be boxed or shrink wrapped depending on client requirements.

### Labeling

Advise us if you require special package or carton labeling, such as special part numbers, descriptions, or instructions.

## Die Cutting

We offer many stock shapes throughout the catalog to reduce costs to our customers. Die charges in the catalog reflect the cost of dies that follow a general die shape and do not require intricate detail, sharp points, or excessive bending (for example, a starburst or tight cuts around a text element). Additional charges will be required for these circumstances.

### To Determine Sq. Inches:

Multiply the width (in.) by the height (in.)  
6 in. x 3.375 in. = 20.25 in.2

General die shape

Tight die shape | Additional charges

## Standard Screen Printed Ink Colors

**Note:** These colors represent our standard inks. Due to the limitations of litho reproduction, actual colors may vary. These colors should only be used as a reference. Other choices not shown include: Black, White, Metallic Silver, Metallic Gold, and Fluorescent Colors (Yellow, Orange, Pink, Red, and Green). PMS matches will require \$43.00(E) per color. We cannot guarantee a perfect match.
