TERMINOLOGY

 **Dry Clean Only** styles should be cleaned by a professional dry cleaner. Hand or machine washing or drying will diminish garment quality.

 **Easy Care** styles are just that – easy to care for! Put them in the wash, dry them, hang them up and wear it again. Easy care garments take the work out of looking great.

 **Home Launder/Machine Washable** is a product designed to be washed in small-batch, mild temperature conditions typical of home machine washers. The garment is designed to last 30–50 wash cycles or more.

 **Industrial Launder** is a product designed to withstand the large-batch wash/dry/press and high temperature conditions prevalent in industrial and commercial laundries. The garment is designed to last 50+ wash cycles. Bleach and other chemicals are generally not recommended. Customers should test product before using it in environments with chemicals and/or very high temperatures before deciding to use.

 **Moisture Wicking** fabric draws moisture away from your skin transferring it to the outer surface keeping you cool, dry and comfortable.

 **Comfort Stretch** fabric is engineered to provide natural stretch, flexibility and comfort.

 **OEKO-TEX® STANDARD 100** standards enable everyone to make responsible decisions and protect natural resources. Products bearing the OEKO-TEX® STANDARD 100 labels have been scientifically tested for the presence of harmful substances and are a better and safer choice for your health.

 **BIOGUARD®** is an antimicrobial technology that inhibits the growth of odor production and stains.

 **REPREVE®** Repreve® fiber contains recycled materials – including plastic bottles. When you see this symbol on the tag, remember: It's what's in it that makes it recycled. With Repreve®, you can be sure you're creating a reprieve for the planet.

 **Soil Release** finish provides for easy care with recommended soil treatment. The release allows stains to be removed more easily during laundering.

 **Sustainable** Edwards is committed to implementing sustainability measurement tools like the Higg index to drive environmental and social responsibility in our supply chain.

 **Snag-Proof** garments resist snags wear after wear. Don't believe it? Try a wire brush!

 **Tuff-Pil® Plus High-Tech Acrylic** fibers used for uniform ready sweater apparel offer low-pil performance, colorfast and durability. The garment is designed to last 30–50 home wash cycles.

 **UV Protected** means more fun, less sun. The dry-mesh fabrics block harmful UV rays with up to a UPF 50 factor.

 **Waterproof** garments keep you dry with DWR (Durable Water Repellent) finish and a fully seam-sealed interior.

 **Water Resistant** garments are coated with DWR (Durable Water Repellent) finish that lets water bead up and roll off.

 **Wrinkle Resistant** fabric is treated to resist wrinkles and the garment holds its shape with multiple washes.
