## MADE TO ORDER BAGS SINCE 1976

Metropak, Inc. is the leading supplier of made to order bags, packaging, and e-commerce mailers for promotional products distributors. The Company's owners, Eric Grossman & Edward Hanson, have been friends since the 3rd grade. They purchased the business over 25 years ago from Eric's father. The two have both been with the company for 30 years or more and have a tremendous passion for the business and the industry it serves.

The company has won numerous awards for its innovation in sustainable packaging and is recognized in the industry for its commitment to customer satisfaction. Some of its exclusive and recently developed products include Ragbags, a reusable bag with a second life, to be repurposed as a rag. OceanPoly Bags and Mailers, made from Marine plastics, they are SCS Certified and lead the fight against ocean plastic pollution. And, Rethink Poly, with 90 % Recycled Content. The largest brands rely on Metropak to support them with eco-friendly packaging that often tells a unique story, and provides an exceptional customer experience.

Metropak continues to invest in new equipment to even further improve lead-times, quality and pricing. In 2021 the company added a new 8 color central impression press which allows printing of stellar 4 color process work and the ability to print larger jobs at very high speeds. We have also added new high-speed bag and mailer lines this past year. These investments will make the company's distributors even more competitive domestically and less reliant on products from overseas.

We know that all businesses have had challenges the past two years, between the unforeseen Covid-19 pandemic, to supply chain issues at every level, and then added to that, the incredible shortage of workers. Running our manufacturing enterprise during this time has been an enormous challenge. I'm proud to say we've not only survived but are thriving and are stronger and better because of it.

A large part of our success is due to the drive of our employees, and our management team. It is in our nature to not only solve problems, but to develop new products that keep our distributors relevant, and customers coming back. We can't thank our distributors enough for their ongoing support, and for continually challenging us to work with them to provide new types of products and programs.

We are very excited to serve you in 2022, our 46th year!  
Thank you very much for your business!

*Eric Grossman*     *Edward Hanson*

# OceanPoly®

A METROPAK EXCLUSIVE

## What is OceanPoly®?

OceanPoly® is one of the best solutions to our marine plastics problem. OceanPoly® contains a minimum of 50% recycled content, 25% from marine plastics (recovered from HDPE bottles and plastic bags) which have been collected from ocean pollution source areas, including beaches and waterways that flow into the oceans. OceanPoly® can be used in manufacturing many different types recyclable packaging, including plastic bags and poly mailers.

## Why use bags & mailers made with OceanPoly®?

The real question is, why not? We all benefit from cleanup of our oceans and waterways. Once plastic makes it into the deep sea, it is nearly impossible to collect on a large scale, and has degraded to the point that it has very little or no commercial use or value. Collecting plastic garbage near its source, in ocean areas like beaches and waterways that flow into our seas, is our best solution to stop the growing marine plastic problem we face today. By using products produced with OceanPoly® you are making a statement that you care!

Marine plastic has become a global problem and is detrimental to our environment and marine life. Visit [OceanPoly.com](http://OceanPoly.com) or scan the QR code here for more information.

## An extended benefit...

Supporting the cleanup effort creates jobs for those in economically challenged regions. Populations like Haiti, Indonesia, the Philippines, Mexico's Yucatan Peninsula and the Dominican Republic. Using products made from OceanPoly®, creates demand and financially incentivizes local populations to collect materials such as HDPE and PET, which can be recycled efficiently.

By choosing OceanPoly®, you are choosing to invest in others, help protect marine life and tackle the ocean pollution problem at its source. Look for bags and packaging with the OceanPoly® logo.

OceanPoly® bags and mailers are certified by SCS, the premier organization for post consumer recycled content verification.

# ragbags

REUSE. REPURPOSE.

U.S. PATENT 9,132,939 and U.S. PATENT 9,132,940  
International Patents Pending

## What is a RagBag?

RagBags are made from a revolutionary bio-based material that is soft, strong, and absorbent. They can be reused and repurposed, eliminating the need for plastic or paper bags. When or if you do throw them away, they're degradable.

## Soak up a spill, dust off furniture, or use it as a lunch bag.

RagBags are so much more than just shopping bags. Their super-absorbent fabric makes them ideal for soaking up spills or daily cleaning around the house. RagBags can replace paper towels and can be used hundreds of different ways. And they're washable, which means you can reuse them over and over again.

## RagBags are 8x more absorbent than a standard paper towel.

A single RagBag when reused can replace two full rolls of paper towels, reducing waste and saving precious resources.

## The endlessly useful, environmentally responsible fabric bag .

### Die-Cut Handle Degradable RagBags:

Made with sturdy 65G plant based non-woven cellulose and corn based PLA blend. These sturdy bags are made for light to medium duty and will hold up to 8 lbs.

### 100's of uses

# ragbags™

REUSE. REPURPOSE.

The only tote bag designed to be repurposed as a rag.

Washable, Reusable, Degradable, Plant-based

## Die-Cut Handle Ragbags

RBAG1518DC

RBAG1316DC

RBAG1013DC

**Material:** White only. Degradable bio-based cellulose non-woven.

**Printing:** 1 color, 1 side imprint, light ink coverage. Due to specialized inks required for this item, ink colors are limited to: Black, Reflex Blue, Navy Blue, Process Blue, Pink PMS #212, Hunter Green close to PMS #349, Lime Green close to PMS #362, Red close to PMS #485.

**Plate:** Can be printed on two sides at same price, add one additional plate charge.

**Over/under run allowance:** 10%.

**Production:** 4-6 weeks from art approval. Production time may be longer during peak season Sept-Dec. Inquire for rush orders.

**Important Printing Information:**

Due to its absorbency, Ragbag imprint will have a somewhat weathered look. Solid "blocks" of ink are discouraged, lighter ink coverage and smaller imprint sizes are recommended for the best results.

All Ragbags are printed with the following Ragbags logo and reusability information in same ink color as customer imprint.

This bag is designed to be repurposed as a cleaning cloth. Degradable - Made with bio-based materials.

# ABOUT US

## Ordering Information

- All orders must be received in writing via fax or e-mail.
- For accuracy please include the following:  
**Item number, style, color and quantity, imprint color and the size of the art.**  
**Ship to address, method of shipping and requested in hand date.**
- Your art file must reference your purchase order number to avoid delays. All orders must be accompanied by vector art. See ARTWORK requirements below.
- Unless otherwise noted the imprint will be centered within the printable area of the bag. (Note: due to bag construction this printable area may not be the exact center of the bag.)

## Credit Policy

- New Accounts: A credit application must accompany or precede your order. Allow 5 days for credit clearance. If you wish to proceed immediately, please enclose a 50% deposit, or your order can be charged to your credit card.
- Established Accounts: Net 30 days. Large dollar volume sales require special arrangements.
- Imported orders require a 50% deposit.

VISA, MasterCard and American Express are accepted. The following information must be provided to insure proper billing and order acceptance.

1. Type of credit card (VISA, MasterCard or American Express)
2. Account Number
3. Expiration Date
4. Name as it appears on the credit card.
5. Security code
6. Billing address if different than company address

**ARTWORK:** All artwork must be vector and submitted via email in either EPS or Adobe Illustrator format. Flexographic printing may sometimes require that modifications be made to the artwork to accommodate tight registration, these modifications will only be done with customer approval. Any changes will be made at customer's request and jobs requiring art time beyond 15 minutes will be billed \$120(g) per hour of art charge. Please inquire for art specifications on multiple color jobs or jobs with screens.

**ACKNOWLEDGEMENTS:** All orders are acknowledged with a confirmation by email. Confirmations for printed orders must be signed and returned prior to scheduling order for production.

**PROOF:** Emailed PDF proofs are sent for new orders or all orders requiring artwork or changes. Printed sample proofs are only available on qualifying orders produced offshore. Proofs are not sent for exact reorders unless specifically requested, additional charge may apply.

**CANCELLED ORDERS:** In many cases custom-made materials are purchased to produce your order. Once a purchase order is received any costs incurred prior to change or cancellation of an order will be the responsibility of the customer.

**SPECIAL PACKAGING:** Available by special quotation. We reserve the right to deviate from the standard packaging information provided on our price schedules, unless specific needs are indicated on the order.

**SHIPPING:** UPS or FedEx Ground will be used for small shipments. Larger shipments will be shipped via truck lines. We reserve the right to determine which carrier will be used if not specified. If purchase order states "will advise" as the ship to address, we must be notified of address five days prior to ship date. Our commitment to on time delivery for sure dated orders is limited to the time prior to pick up by the freight company. Once freight is consigned to freight carrier, we accept no responsibility for any delay of delivery. We do not ship with US Postal Service.

**SPLIT SHIPMENTS:** Available in full case lots only. Call for pricing.

### INK COLORS:

Any non-metallic PMS ink color match is free for large quantity orders of plastic bags and poly mailers of 5,000 or more. A PMS Ink match charge of \$95 (G) will apply on all orders below 5,000. Fluorescent ink colors are not available. Please see our standard PMS ink colors below.

### STOCK INK COLORS

Custom PMS ink match, non-metallic match \$95 (G)

## Domestic Printing Information

### PLATE CHARGES:

Plate charges for the standard imprint size are listed with each product on their respective page. If an alternate imprint area is required, the plate charge is subject to change. To print on 1 side, plates are \$1.95 (g) per square inch or \$45 (g) minimum per color, per copy. When printing 2 sides, plates are \$3.45 (g) per square inch or \$90 (g) minimum per color, per copy. Plate charges will double for bag sizes less than 12" wide. To calculate plate charges, measure the overall length \* the overall width of each color separately. The resulting area is the plate size for each color. Plates are stored for 3 years upon which they are discarded. During that time, exact reorders will not incur plate charges. For orders requiring more than 3 colors, halftones, or process printing, a custom quote is required.

### EYE MARKS:

Manufactured plastic bags require a small mark (approximately 3/16" x 1") be printed on the face of the bag. This is needed to identify where to cut and seal the bag.

### OVER/UNDER RUN ALLOWANCE:

Less than 25,000 = 20%; 25,000-50,000 =15%; 50,000+ = 10%  
These production allowances are based on industry standards primarily due to the flexo-web printing process. Special needs can be accommodated, but will require a custom quotation. Material tolerances, bag sizes and thickness can vary by as much as 10%.

### PRODUCTION TIME:

Listed separately for each product. Three to six weeks from proof approval; depending on product being ordered.

### SHIPPING: FOB Factory

## Off Shore Manufacturing General Information

Metropak manufactures its hand finished bags in China, Vietnam, Cambodia and Mexico. Due to the current volatility of international ocean freight, Metropak is not publishing offshore pricing.
