Seed Pens For Sustainability

Use Your Pen, Plant Your Seeds

1-BUY GOOD PRODUCT
MADE FROM CORN STARCH
BIODEGRADABLE.

Biodegradable Plastic

2-PLACE AN ORGANIC BIN/GREEN WASTE OR LEAVE IT IN NATURE.

3- THEN IT WILL BE BIODEGRADES IN NATURE AND IT WILL BECOME
NICE PLANTS WITH SEEDS.

DESIGN PATENTED

- Biodegradable plastic In 2009, the United States generated 30 million tons of plastic waste. Thirteen million tons was plastic containers and packaging, 11 million tons was durable plastic goods, and 7 million tons was non-durable goods, such as plates and cups. Only seven percent of this plastic waste was recovered for recycling. These statistics tell us two things; there's a lot of plastic in the world, and it's hard to get rid of. It's a product that is built to last. Can biodegradable plastic help in the battle against plastic waste? Biodegradable means that a substance can be broken down by living organisms. 'Biodegradable' is a catch-all word and covers a variety of types of plastic. In fact, biodegradable plastics are not necessarily made from bio-material (e.g., plants) – some biodegradable plastics are made from oil in the same way as conventional plastics. Bioplastics are made from natural materials such as cornstarch. You may not be able to see the difference between a bioplastic and a plastic made from petrochemicals.
- Over time (sometimes in only a few weeks) bioplastics break back down into natural materials. The cornstarch absorbs water and swells, causing the molecules to break. Bacteria in the soil then digest these molecules. Biodegradable plastics are either hydro degradable or oxo degradable. They contain additives that cause them to decay in the presence of light and oxygen. But unlike bioplastics, biodegradable plastics are made of petrochemicals and don't always break down into harmless substances.
- NATIVE AMERICAN QUOTE
- **"We do not inherit the earth from our ancestors, we borrow it from our children"**

ECO SEED 100- SEED PENCILS

DESIGN PATENTED

Usefulness is Key and Consumers will be much more likely to keep a promotional product that is useful, according to the survey. For writing instruments, the percentage for **USEFULNESS** is 91%.

Study also asked respondents whether they could identify the advertisers on the promotional items they currently owned. The result: Nearly nine in 10 (86%) U.S. recipients of promotional merchandise can identify the advertiser on the item, the highest of any country in the study.

On Study, the average number of impressions each promotional product receives was calculated. The number of impressions a product makes was derived from multiplying how long a recipient has the product to how many people he meets each month while using it. In the U.S., we again saw that bags generated the most impressions (5,983) of any item in the study. That's because bags are frequently used, often in public places where they can be seen by many people. Other items that deliver extremely high numbers of impressions in the U.S. include writing instruments 3,134 impressions.

The cost per impression of an ad specialty (0.6 cents) is better than of TV (1.8 cents), magazines (1.8 cents) and newspapers (0.7 cents)

MULTI FUNCTIONAL

QR Seed Pens

- The world's first biodegradable pen made from corn! Corn? Yes, corn!
- Except for the ink refill, this green pen is made from corn, a revolutionary new material derived from cornstarch. Corn is remarkably similar in look and feel to ordinary plastics with one important exception: it is completely biodegradable! This means that unlike conventional plastics that never breakdown, this green pen will disintegrate in about a few months after being discarded (breakdown occurs in soil, corn posters, landfills, etc.)
- Corn raw material supplied by
- BIOPLA, and we do have certificates for DIN EN 13432 ASTM D6400 test and SGS reports.
- 100% biodegradable plastics is only option to save the environment. It is important for Growing Economies.

General Terms

Terms & Conditions

This section sets forth the Terms and Conditions of sale for Asco Global LLC-3D Promoplastic Inc. We reserve the right to update or modify these Terms and Conditions at any time and without prior notice, please scan the QR code at the top of this page for the most updated Terms and Conditions and pricing. By placing an order with 3D Promoplastic Inc, the purchasing party (Purchaser) agrees to follow and be bound by the following Terms and Conditions.

General Terms

Every effort has been made to ensure the accuracy of prices, item numbers, availability and dimensions; however, 3D Promoplastic Inc is not responsible for typographical errors. 3D Promoplastic Inc reserves the right to correct any errors or omissions. The total order amount, including tax and delivery charges will be charged to Purchaser's credit card in full at the time the order is placed.

Artworks

All artwork submissions should be in Adobe Illustrator, PDF, EPS, TIF, or CorelDraw format at 300 dpi or higher.

Order Acknowledgment

All orders are acknowledged via email. All changes must be confirmed in writing. All new or repeat orders will receive a final proof within a reasonable amount of time from 3D Promoplastic Inc by email. Purchaser accepts full responsibility to follow up with a final proof approval after Purchaser receives the final proof. 3D Promoplastic Inc will not be responsible for any delayed shipment since final proof approval was not received from the Purchaser.

Samples/Proofs

E-Proof: Signature is required to begin production. All virtual proof must be reviewed carefully. 3D Promoplastic Inc is not liable for any incorrect artwork or layout after proof approval.

Spec/Pre-Production Samples: Highly recommended for large quantity orders or PMS color matching orders. **\$40.00 (g)** charge per color/position on laser or silkscreen plus product cost and shipping. (exact matches are not guaranteed).

Random/Blank Samples: With sufficient inventory, 3D Promoplastic Inc will ship within 48 hours and charge Purchaser shipping cost. Up to 5 pen samples under value \$1.00 can be requested at no charge if a shipper account is provided. All sample requests must be emailed to ensure accuracy. Purchaser accepts the duty to follow up on the sample request if no confirmation is received within 24 hours or if further information is necessary to fulfill the request.

Repeat Orders: **\$25.00 (g)** per color/position. Purchaser agrees to reference previous purchase order when placing orders. Personalization: Please submit a typewritten list (Text or Microsoft Excel format) to ensure accurate spelling. Setup is **\$40.00 (g)**. File must be saved in the format (upper/lower cases etc.) to be lasered.

Stock engraving style available: Arial, Times New Roman, Times New Roman Italic, Script

Emailed Paper Proofs: 3D Promoplastic Inc will furnish PDF or JPEG (black & white) virtual proofs at no charge.

Virtual/Digital-Samples: A Virtual Sample is a computer-generated sample in PDF or JPEG format via e-mail. A virtual sample's color and size may vary with the actual product and is not meant to be exactly like the actual product. An EPS artwork must be submitted.

PMS Match: Add **\$100.00 (g)** for custom made barrel special PMS color matches. Please note that a true PMS color match may sometimes not be possible due to the imprint method, surface of the item, and the color of the item itself. A spec/pre-production sample is highly recommended to ensure customer satisfaction (see above for spec/pre-production sample pricing).

Shipping

Transit time is not included in production time.

Shipping Methods: Orders will ship via FedEx or UPS ground unless otherwise specified. 3D Promoplastic Inc can also use purchaser's own shipping account if provided.

Drop/Split Shipment Charge: Please contact us for a quote
