### 2D Label Sewn onto a Variety of Garments

- When it comes to customizing garments and accessories, the right decoration technique can make all the difference. At Flexsystems, we offer a range of high-quality decoration methods to suit every need, from 2D Label sewn on labels and silkscreen to heat seal and more.
- The distributor chose a 2D Sewn on patch combination with Silkscreen print that works well with several apparel styles. In this case the distributor provided hoodies, t-shirts, caps and beanies to decorate. The hoodies and t-shirts had 2D patches sewn on front with a silkscreened back print image. The beanie and cap only needed a 2D Patch sewn on front to complete the impressive branding results.

### Silkscreened Images Applied to the back of T-Shirts and Hoodies

- Making a bold statement on the garments, the distributor's customer wanted large and colorful logos to promote their brand in the field.
- Combined with the 2d patches on the front, the two different decoration methods enabled Tactical Plumbing to stand out in a very competitive field.
